Job Application for Data Scientist - ML Engineer

Dear Hiring Manager,

About Me

I have a Bachelor's degree in Mathematics from Aristotle University of Thessaloniki, a Masters degree in Artificial Intelligence and a Masters degree in Statistics all from the same University. I have 2 years of experience in Data Science positions ranging from data cleaning to model deployment. As per the requirements for the position, you will notice in my resume that i have experience developing and implementing deep learning models, and i have a solid knowledge in Machine Learning and Statistics being familiar with packages in Python and in R.

My Experience

I started my career as a Data Scientist, in Deus Ex Machina AI. Being in a startup environment, I gained valuable lessons and experience which helped me greatly improve my soft and my hard skills as well. In this position, I worked in projects related to Bioinformatics that required advance knowledge of Statistics, Machine Learning and above all else, Problem Solving. I also worked on a projects related to Information Retrieval where I gained theoretical and practical knowledge of Natural Language Processing.

During my work experience at Accenture, I had an extensive range of responsibilities including selecting features, optimizing classifiers, mining data, processing data, and doing ad-hoc analyses. As a Data Scientist, I was required to have excellent commu- nication skills, understanding of machine learning algorithms, excellence in Python, advanced knowledge of SQL, and excellence in applied statistics.

Why Me?

I believe that my analytical and problem-solving skills, advanced knowledge of applied mathematics and statistics, and level of education make me a great fit for this position. Also I'm a great team player.

Sincerely,

Panagiotis Souranis
